Portfolio: [Vignesh Kumar S — Full Stack & AI Engineer](#)

PROFESSIONAL SUMMARY

Final-year Computer Science Engineering student with hands-on experience developing scalable full-stack web and desktop applications using React.js, Next.js, Node.js, Express.js, FastAPI, JavaScript, Java, and Python. Experienced in designing REST APIs, responsive user interfaces, authentication (JWT/RBAC), workflow automation using n8n, and database-driven applications with MongoDB and PostgreSQL. Proficient in Git, Docker, Linux, Postman, and AI-assisted development tools including ChatGPT, GitHub Copilot, Cursor, Claude Code, and OpenAI APIs. Passionate about building scalable software solutions and solving real-world engineering problems.

EDUCATION

B.E Computer Science and Engineering | Sri Shakthi Institute of Engineering and Technology 2023 - 2027
CGPA: 8.1/10

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, Java, HTML5, CSS3
Frontend: React.js, Next.js, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js, FastAPI, REST APIs, JWT Authentication, Role-Based Access Control (RBAC), Webhooks, n8n Workflow Automation
Databases: MongoDB, PostgreSQL, MySQL, SQLite, Firebase, Supabase
Desktop Development: Electron.js, Electron Builder
Automation & Testing: Postman, Playwright (Basics), Robot Framework (Basics), JMeter (Basics)
AI & Productivity: ChatGPT, GitHub Copilot, Cursor, Claude Code, OpenAI APIs
Developer Tools: Git, GitHub, Docker, Linux, VS Code, AWS (Basics)
Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms (Basics), Database Design, SDLC, Performance Optimization

PROJECTS

- Interior Project Management Automation | React.js • FastAPI • PostgreSQL • n8n Apr 2026
 - Developed **6+ responsive dashboard modules** for enquiry tracking, approvals, task management, and real-time project monitoring using React.js and FastAPI.
 - Automated **4 core business workflows** using **n8n**, webhooks, and REST APIs, reducing manual administrative effort and improving operational efficiency.
 - Implemented **JWT Authentication**, Role-Based Access Control (RBAC), and PostgreSQL integration to ensure secure access and reliable data management.
- TaskFlow Desktop | Electron.js • React.js • Node.js • SQLite Feb 2026
 - Developed a cross-platform desktop application using **Electron.js, React.js, Node.js, and SQLite** with offline data storage and a responsive user interface.
 - Implemented **CRUD operations**, search, filtering, desktop notifications, and modular architecture to enhance usability and application performance.
 - Packaged and deployed the application using **Electron Builder**, ensuring seamless installation and cross-platform compatibility.
- Student Cloud Storage Platform | React.js • Node.js • Express.js • MongoDB Dec 2025
 - Developed **8+ REST API endpoints** for user authentication, file upload, retrieval, and secure file management using Node.js and Express.js.
 - Implemented **JWT Authentication** and **Role-Based Access Control (RBAC)** to provide secure multi-user access and protect sensitive user data.
 - Integrated **MongoDB** for scalable file metadata management and built responsive React.js interfaces for an improved user experience.

- Developed a phishing detection system using **React.js, Java, and REST APIs** to analyze URL characteristics, domain structures, and suspicious patterns for real-time threat detection.
- Integrated frontend and backend services to display prediction results through an interactive, responsive user interface with seamless API communication.
- Published research based on the project in the **International Journal of Engineering Inventions (2025)**, demonstrating practical implementation and research contribution.

- Developed an AI-powered meeting summarization application using **Node.js, JavaScript, OpenAI Whisper API, and LLMs** to automate audio transcription and generate concise meeting summaries with action items.
- Integrated AI APIs and built a modular backend workflow, reducing post-meeting documentation time by **approximately 80%** while ensuring reliable and scalable text processing.
- Designed an automated text-processing pipeline to organize transcripts, generate structured summaries, and improve documentation efficiency for business and academic meetings.

INTERNSHIP

- Developed a responsive corporate website using React.js by building reusable UI components and modern frontend architecture.
- Integrated frontend modules with backend REST APIs using Git/GitHub version control and supported deployment activities.
- Improved application quality through debugging, functional testing, cross-browser compatibility testing, and performance optimization.
- Collaborated with the development team to maintain responsive layouts and improve user experience.

ACHIEVEMENTS

- Overall Student Coordinator for the **Kalam** college event, leading event planning, team coordination, and execution (2025).
- Published research on the **AI-Powered Phishing Detection System** in the *International Journal of Engineering Inventions (2025)*.
- District-level **Badminton Champion** with **18 Gold** and **12 Silver** medals across competitive tournaments.
- District-Level Motorcycle Racing Champion** – Earned **60 Gold medals** in district-level motorcycle racing competitions, reflecting strong determination, focus, and sustained competitive performance.

AREAS OF INTEREST

- Software Engineering
- Full Stack Development
- Backend Engineering
- Cloud Computing
- Artificial Intelligence Applications
- Workflow Automation

CERTIFICATIONS

- AWS Cloud Practitioner Essentials – AWS
- Full Stack Development (Virtual Internship) – NoviTech R&D Pvt.Ltd
- Programming in JavaScript – Scaler Topics
- Git & GitHub – SimpliLearn
- DevOps – Intellipaat
- Docker – SimpliLearn
